Molecular Membrane Biology

Volume 11 Number 1 January–March 1994

Contents

Editorial 1

Review

Cleavable signal peptides are rarely found in bacterial cytoplasmic membrane proteins
Jenny K. Broome-Smith, S. Gnaneshan, L. A. Hunt, F. Mehraein-Ghomi, L. Hashemzadeh-Bonehi, M. Tadayyon and E. S. Hennessey 3

Papers

Role of glutamate-269 in the lactose permease of *Escherichia coli*
M. L. Ujwal, Miklós Sahin-Tóth, Bengt Persson and H. Ronald Kaback 9

Characterization of the solubilized NMDA receptor complex from a rat brain with [^{3}H]L-689,560, a glycine site antagonist
Kathleen Quirk, Alan C. Foster and Ruth M. McKernan 17

GABA uptake and release by a mammalian cell line stably expressing a cloned rat brain GABA transporter
Janis L. Corey, John Guastella, Norman Davidson and Henry A. Lester 23

Role of *N*-glycosylation in the expression of human band 3-mediated anion transport
Jonathan D. Groves and Michael J. A. Tanner 31

Rapid determination of the transbilar distribution of NBD-phospholipids in erythrocyte membranes with dithionite
Thomas Pomorski, Andreas Herrmann, Alain Zachowski, Philippe F. Devaux and Peter Müller 39

Effects of NH_4Cl and nocodazole on polarized fibronectin secretion vary amongst different epithelial cell types
Seng Hui Low, Siew Heng Wong, Bor Luen Tang and Wanjin Hong 45

The K^+-efflux system, KefC, in *Escherichia coli*: genetic evidence for oligomeric structure
Roseileen M. Douglas, Graeme Y. Ritchie, Andrew W. Munro, Debra McLaggan and Ian R. Booth 55

Book reviews

Viral Fusion Mechanisms (Jack A. Lucy) 55

Molecular Biology of Membranes: Structure and Function (Dennis Chapman) 63

Calendar of events 65

Forthcoming papers 65

Volume 11 Number 2 April–June 1994

Contents

Review

Mechanisms of myelin basic protein and proteolipid protein targeting in oligodendrocytes
S. A. Kalwy and Ross Smith 67

Papers

A combined X-ray and neutron diffraction study of selectively deutered melittin in phospholipid bilayers: effect of pH
J. P. Bradshaw, C. E. Dempsey and A. Watts 79

Structural and functional studies of a synthetic peptide mimicking a proposed membrane inserting region of a *Bacillus thuringiensis* δ-endotoxin
Corinne E. Cummings, Graham Armstrong, T. Charles Hodgman and David J. Ellar 87

Inhibition of endocytic transport by aluminum fluoride implicates GTPases as regulators of endocytotis
Maria I. Colombo, James Lenhard, Luis Mayorga, Walter Beron, Heather Hall and Philip D. Stahl 93

Molecualr cloning of a tyrosine kinase gene from the marine sponge *Geodia cydonium*: a new member belonging to the receptor tyrosine kinase class II family
Heike Schäcke, Heinz C. Shröder, Vera Gamulin, Baruch Rinkevich, Isabel M. Müller and Werner E. G. Müller 101

Poly(A)$^+$ RNA from the mucosa of rat jejunum induces novel Na^+-dependent and Na^+-independent leucine transport activities in oocytes of *Xenopus laevis*
Sylvia Y. M. Yao, William R. Muzyka, John F. Elliott, Christopher I. Cheeseman and James D. Young 109

Modulation of phospholipases A_2 and C activities against dilauroylphosphorylcholine in mixed monolayers with semisynthetic derivatives of ganglioside and sphingosine
Maria A. Perillo, Alessandro Guidotti, Erminio Costa, Robert K. Yu and Bruno Maggio 119

Biosynthesis and intracellular transport of a membrane glycoprotein (plgp57) of the prelysosome compartment
Lisa Heller, John E. Park and William J. Brown 127

Book reviews
The Annexins (John H. Walker) 135

Cholesterol in Model Membranes (Dennis Chapman) 136

The Regulation of Membrane Lipid Metabolism, 2nd Edn. (Mike Gurr) 137

Cellular Membrane: A Key to Disease Processes (Lionel Ginsberg) 138

Calendar of events 139

Volume 11 Number 3 July–September 1994

Contents

Review
Nuclear pore complex ion channels
José Omar Bustamante, Andrejs Liepins and John Allan Hanover 141

Papers
Ionophore-mediated loading of Ca^{2+} into large unilamellar vesicles in respect to transmembrane pH gradients
Jeffery J. Wheeler, Jeffrey A. Veiro and Pieter R. Cullis 151

The full length of a mitochondrial presequence is required for efficient monolayer insertion and interbilayer contact formation
Johanna M. Leenhouts, Zsolt Török, Rudy A. Aemel, Johannes de Gier and Ben de Kruijff 159

A *trans*-dominant mutation in human immunodeficiency virus type 1 (HIV-1) envelope glycoprotein gp41 inhibits membrane fusion when expressed in target cells
Hannah Friedman Elson, Dimiter S. Dimitrov and Robert Blumenthal 165

Interactions between metal ions and poly(ethylene glycol) in the fusion of human erythrocytes
Quet F. Ahkong, Jocelyn M. Baldwin, Rita O'Reilly and Jack A. Lucy 171

Phosphatidylserine vesicles inhibit phagocytosis of erythrocytes with a symmetric transbilayer distribution of phospholipids
Deepti Pradham, Patrick Williamson and Robert A. Schlegel 181

Book reviews
Membrane Protein Expression Systems. A User's Guide. Edited by G. W. Gould (M. J. A. Tanner) 189

Thermodynamics of Membrane Receptors and Channels. Edited by M. B. Jackson (M. S. P. Sansom) 190

Molecular Mechanisms of Drug Action. By C. J. Coulson (C. I. Ragan) 191

The Membrane of Cells. By P. L. Yeagle (B. D. Gomperts) 192

Calendar of events 195

Volume 11 Number 4 October–December 1994

Contents

Editorial 197

Reviews

Back and forth: the regulation and function of transbilayer phospholipid movement in eukaryotic cells (Review)
Patrick Williamson and Robert A. Schlegel 199

Glucose-6-phosphatase proteins of the endoplasmic reticulum (Review)
Ann Burchell, Bernard B. Allan and Robert Hume 217

Papers

Cloning, sequence analysis and expression pattern of mouse desmocollin 2 (DSC2), a cadherin-like adhesion molecule
Jo E. Lorimer, L. S. Hall, J. P. Clarke, J. E. Collins, T. P. Fleming and D. R. Garrod 229

Na,K-ATPase characterized in artificial membranes. 1. Predominant conformations and ion-fluxes associated with active and inhibited states
B. M. Anner, M. Moosmayer and E. Imesch 237

Na,K-ATPase characterized in artificial membranes. 2. Successive measurement of ATP-driven Rb-accumulation, ouabain-blocked Rb-flux and palytoxin-induced Rb-efflux
B. M. Anner and M. Moosmayer 247

Subcellular distribution and immunocytochemical localization of Na,K-ATPase subunit isoforms in human skeletal muscle
Harinder S. Hundal, Diane L. Maxwell, Aamir Ahmed, Froogh Darakhshan, Yasuhide Mitsumoto and Amira Klip 255

Conformation of the cytoplasmic domain of phospholamban by NMR and CD
Julia A. Hubbard, Lesley K. MacLachlan, Eugene Meenan, Colin J. Salter, David G. Reid, Philippe Lahouratate, John Humphries, Nichola Stevens, David Bell, William A. Neville, Kenneth J. Murray and John G. Darker 263

Structure and function of the class C tetracyline/H^+ antiporter: three independent groups of phenotypes are conferred by TetA (C)
Jeffrey, K. Griffith, Denise H. Cellular, Colleen A. Fordyce,, Kent G. Hutchings and Angelo A. Mondragon 271

Book reviews

Biomembrane Protocols: II. Architecture and Function. Edited by J. Graham and J. Higgins (J. A. Lucy) 279

Biological Membranes: Structure, Biogenesis and Dynamics. Edited by J. A. F. Op den Kamp (S. A. Baldwin) 280

Calendar of events 281
